AMAZING ENERGY

Powering a sustainable future

Climate change is one of the single biggest challenges facing humanity, with scientific consensus that urgent action is needed to prevent the planet from warming to catastrophic levels.

Climate change is one of the single biggest challenges facing humanity, with scientific consensus that urgent action is needed to prevent the planet from warming to catastrophic levels.

This has seen governments and business across the world take steps to invest in the energy transition. In the UK, the government set in law a commitment to reaching net zero carbon emissions by 2050 – something that can only be achieved by effecting big changes across all areas of our daily lives. From how we generate energy, to how we heat our homes, our transport system, and the processes sitting at the very heart of business and industry.

At Anesco, we are proud to be playing our part, by accelerating the transition to net zero and a sustainable, low carbon energy system. We deploy and maintain carbon free solar power generation, together with the energy storage needed to keep a renewable energy system in balance. We also help fuel poor households improve their efficiency and lower energy bills.

Our specialist team has been responsible for the development and construction of more than 130 high performing solar farms and energy storage facilities.

The technologies we have deployed and manage are generating over 1GW of renewable energy and 1.25 million tonnes of CO2 has been saved from energy efficiency measures we have enabled. We also have a huge pipeline of future projects to step up Anesco's contribution.

As a fast growing and ambitious company that has people at its core, we are committed to making a difference by powering a sustainable future.

Mark Futyan Chief Executive Officer

Who we are

Anesco is a market leader in renewable energy and energy efficiency. We develop, design, construct, operate, maintain and optimise high performing grid scale renewable energy assets.

From humble beginnings back in 2010, we quickly grew to become one of the UK's largest providers of solar and battery storage technologies.

To find out more about our projects, full range of services and team, visit: anesco.co.uk

- 2014** ● Made history by connecting the UK's first utility-scale battery storage unit
- 2015** ● Installed the largest optimised solar farm in Europe
- 2017** ● Unveiled Clayhill, the UK's first subsidy-free solar farm, marking a landmark achievement for the industry
- 2020** ● Broke ground on our first international projects
- 2021** ● Acquired by leading global investment fund Ara Partners, to support our extensive growth plans
- 2022** ● Launched Anesco Netherlands and Anesco Germany

106 solar farms constructed

30 energy storage facilities built

350,000 people raised out of fuel poverty

24,000+ assets under our management

Why are we recruiting?

Anesco's continued success in delivering first-class, industry leading projects means we need to invest in a future-ready team to match our project pipeline and projected growth strategy.

We have an impressive immediate pipeline of solar and storage projects totalling ~600MW with more than 300MW already in construction.

Our aggressive growth strategy towards 2025 includes:

- Future pipeline of 1GW+
- Further expansion across the European market
- Looking to capitalise on a market that has never been busier

We are investing in people, processes and systems to support our growth strategy, undergoing a cycle of continuous improvement and ensuring we are fit for the future.

As well as being professional, experienced and qualified, if you have the following qualities, we want to hear from you:

- Motivated
- Agile
- Flexible
- Committed
- Resilient
- Collaborative

Our people

People sit at the heart of everything we do

From being a trusted partner to our customers and supply chain; to supporting our team members to reach their full potential; and the commitment we make to the local communities in which we operate.

We have an Investors in People Gold standard accreditation and truly understand that people are our greatest asset. It is their ambition, experience and drive for excellence that lies at the heart of our success.

How can you apply?

If you would like a career with a fast-growing, low carbon energy company please visit:

Why join us?

Be a valued part of our growth journey

- Make a difference in helping accelerate the transition to net zero and a cleaner, greener energy system.
- Work on high-impact renewable energy projects in a fast-growing and ambitious company whose revenues are set to double each year for the next two years.
- Work with talented professionals across a diverse team where your knowledge, experience and dedication are recognised and valued.

What we offer

- Flexible working
- A competitive salary and discretionary bonus scheme
- Pension scheme
- Life Insurance
- Annual Benefit Allowance
- Cashback on day-to-day medical expenses
- Employee Assistance Program (expert advice, care and support)
- Discounts and cashback rewards at over 800+ high street and online retailers
- A suite of voluntary employee benefits including Electric Vehicle Car Scheme, Private Medical Insurance, Cycle2Work, SmartTech and Holiday Trading
- Relaxed dress code
- A great social space
